

MEC 14 HANOI, VIETNAM
WORKSHOP 28-30 OCT 2019

CDS technology – Multi-pollutant emission control technology for multiple industrial applications

Christian Moser
Hamon & Cie (International) S.A.

This paper will highlight the main characteristics and advantages of the CDS technology. Latest experiences and results with new installations and upgrades of existing plants for coal-fired power plants will be demonstrated and discussed. Furthermore the adaptation to other industrial application will be presented.
